Product Insert – Skin Seal

Topical Skin Adhesive
For topical skin closure (Cuts and wound closure) in surgical, emergency, and minor wound care settings.

Product Description
Skin Seal is a sterile, single-use, topical skin adhesive formulated with N-Butyl 2- Cyanoacrylate, designed to close superficial skin wounds quickly and effectively. Upon application, the applied monomer polymerizes to form a strong bond to keep the skin edges approximated, the polymer film that forms is flexible, waterproof barrier that protects the wound and heals the wounds with primary infection. This is achieved by restoration of epithelium by natural growth.

Indications for Use
Skin Seal is indicated for the closure of:
- Surgical incisions (e.g., general surgery, laparoscopic procedures, dermatologic surgery)
- Minor cuts, wounds, lacerations, and abrasionsSubcuticular sutures followed with Tope closure of Port after performing laproscopic Surgery.
- Skin tears in paediatric and geriatric patients
- Post-surgical incisions as an adjunct to sutures or subcuticular closure
- Episiotomy or perineal tears
- Scar revisions and excision closures
- Cleft lip repairs
- In Suture less Circumcisions
- Tubectomy incisions
- Skin graft donor and recipient sites
- Dental skin closures
- Cosmetic Surgery
- Gastro varices
- Emergency Military kit

Contraindications
Do not use Skin Seal:
- On infected or contaminated wounds
- On mucosal surfaces (e.g., mouth, eyes, internal genitalia)
- On high-tension wounds without additional support
- On wounds with active, uncontrolled bleeding
- In patients with known cyanoacrylate allergy
- Should not be used on the patients with known infections or preoperative infections.

Warnings & Precautions
For external use only
- Ensure complete hemostasis prior to application
- Do not apply inside the wound—apply only on approximated skin edges
- Avoid contact with eyes and mucous membranes
- Keep away from instruments or gloves to prevent accidental bonding
- Store at controlled room temperature (15-30°C / 59-77°F), avoid exposure to light or excessive heat
- Single-use only, discard after use
- Skinseal has an inherent property to adhere/stick to most of the substrates. One needs to be careful as not to spill out accidentally to avoid sticking to the gloves, stainless steel article like surgical blade or any other material. If it is accidentally spilled on the tissue body parts, that needs to be cleaned using solvent like acetone followed by cleaning with water.
- Do not apply any other medications or creams to the wound.
- Do not scratch the film of the Skinseal after the application.
- Report in case there is any discomfort, redness, drainage, swelling or other concerns regarding the wound or cut to your Doctor.
- Apply a dry protective dressing in children or patients who cannot follow the instructions.

Application Instructions

1. Wound Preparation

- Cleanse wound with sterile saline or antiseptic solution
- Ensure the area is dry and bleeding is controlled

2. Approximate Wound Edges

- Gently bring skin edges together using fingers, forceps, or an assistant

3. Activate & Apply Skin Seal

- Crack the ampoule or press the applicator to initiate flow
- Apply a thin, even layer of adhesive over the approximated skin edges
- Avoid excess application and do not let adhesive enter the wound Check the instructions manual with as per the skin seal instruction manual as attached.

4. Drying

- Allow adhesive to polymerize fully (typically 30-60 seconds)
- Do not apply dressings that stick to the adhesive

5. Post-Application Care

- Advise patient to keep the area dry for the first 24 hours
- The adhesive will naturally slough off in 5-10 days

Product Advantages

- Fast, needle-free closure
- Waterproof and microbial barrier
- Reduced risk of infection
- No suture removal required
- Improved cosmetic outcome
- Pain-free and patient-friendly

Storage

- Store in a cool, dry place at 15-30°C (59-77°F)
- Do not refrigerate or freeze
- Protect from direct sunlight and moisture
- Use by the expiration date on the packaging

Presentation

Skin Seal is supplied in single-use sterile applicators with a pack size of 0.25 mL.
