SkinSeal
just seal & heal

Skin Seal – Advanced Topical Skin Adhesive

SAFE • FAST • PAINLESS WOUND CLOSURE

JUST SEAL & HEAL

What is Skin Seal?

1. A sterile, single-use topical skin adhesive.
2. Used for closing superficial wounds & incisions.
3. Quick, painless & effective alternative to sutures or staples.

Why Skin Seal?

1. Sutures require needles, cause pain & need removal.
2. Staples may lead to scarring & infection risk.
3. Skin Seal provides a painless, needle-free option with better cosmetic outcomes.

Key Features

1. Pack Size Available: 0.25 ml, 0.50 ml, 0.75 ml, 1.00 ml
2. Forms a strong polymer film to hold wound edges.
3. Self-peeling as wound heals.
4. Sterile & single-use.

Mechanism of Action

1. Apply a thin layer on approximated wound edges.

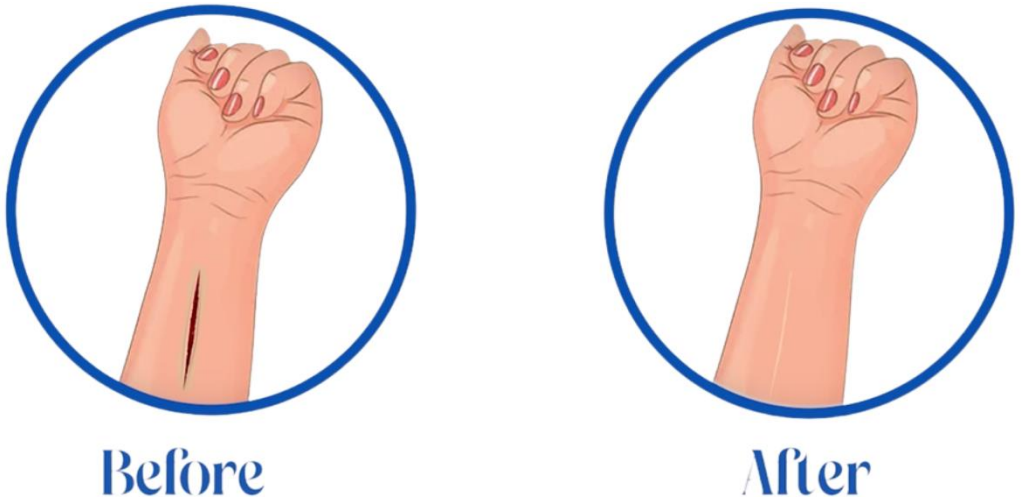

2. Polymerizes within seconds to form a film.

3. Film acts as a barrier to microbes and protects the wound.

Benefits for Doctors

1. Faster closure compared to sutures.
2. Easy to use – no anesthesia required.
3. Saves operating room time.

Benefits for Patients

1. Painless & needle-free.
2. No suture removal visits.
3. Superior cosmetic results with minimal scarring.

Clinical Applications

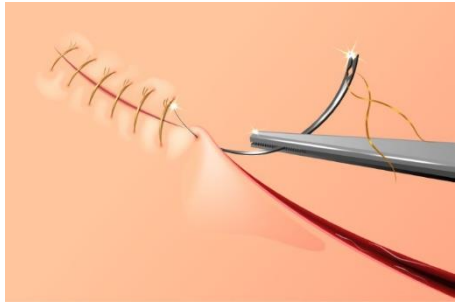

1. Minor surgical incisions.
2. Lacerations, cuts, and abrasions.
3. Post-operative skin closure in dermatology, ENT, paediatrics.

Indications & Contraindications

1. ✓ Use for: Superficial wounds, clean incisions.
2. ✗ Avoid in: Infected wounds, high-tension areas, mucosal surfaces.

Comparison Chart

1. Sutures: Longer time, painful, more scarring
2. Staples: Moderate time, some pain, higher scar
3. Skin Seal: Fastest, painless, minimal scar

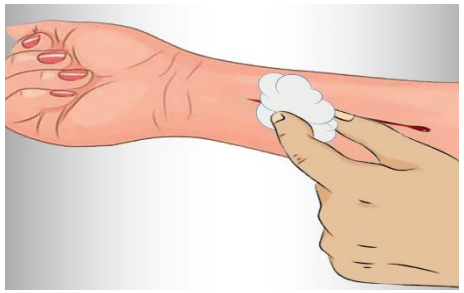

Shelf Life & Packaging

1. Pack Size Available: 0.25 ml, 0.50 ml, 0.75 ml, 1.00 ml
2. Shelf life: 24 months .
3. Store below 30°C in a cool, dry place

Instructions for Use

1. Apply thin layer of Skin Seal.
2. Clean & dry wound.
3. Approximate wound edges.
4. Allow polymerization (10–15 sec).

Safety & Precautions

1. Non-toxic, non-pyrogenic adhesive.
2. Do not use inside the wound cavity.
3. Avoid contact with eyes or mucosa.

Case Study

1. Paediatric wound closure
2. No fear of needles, painless process.
3. Faster healing & better compliance.

Before

After

Evidence & Research

1. Studies show reduced infection rate compared to sutures.
2. Superior patient satisfaction due to painless closure.
3. Supported by multiple clinical trials.

Cost-Effectiveness

1. Saves operation time.
2. No suture removal OPD visit.
3. Better outcomes at similar cost.

Why Choose Skin Seal?

1. Faster, painless wound closure.
2. Better cosmetic results.
3. Safe, sterile, and easy to use.
